

Indice specifico *Bollettino Malacologico* 1999

a cura di Francesco Pusateri

ABSTRACT: l'indice è stato compilato in ordine alfabetico specifico, facendo seguire il nome generico. I seguenti simboli indicano: £ = fossile; ° = sottogenero, # = non molluschi, *cd = cartina di distribuzione; *fc = foto colori; *fb = foto bianco e nero; *ai = disegno anatomia; *air = disegno radula; *me = disegno morfologia esterna; *gr = grafico; *semc = morfologia conchiliare al microscopio elettronico a scansione; *semr = morfologia radulare al microscopio elettronico a scansione.
